

**Chase Anderson, P.E.**

*Thornton Tomasetti*

He has more than 10 years of structural engineering experience in forensic investigation, property loss consulting, litigation support, and structural analysis and design. He has performed numerous hurricane-related structural and building envelope investigations throughout the coastal areas of every state from Texas to North Carolina. Chase has worked on high-profile investigations, including emergency response for the collapse of the FIU pedestrian bridge and CDMX Metro Line 12. He has project experience in the residential, commercial and industrial sectors, including design and construction for multi-billion dollar petrochemical facilities. Mr. Anderson earned his B.S. degree in Civil Engineering from Texas A&M University and his M.S. degree in Structural Engineering from the University of Texas at Austin.

He is currently:

- Secretary for the Committee on Forensic Investigations of the Forensic Engineering Division of ASCE
