

Adam Croker
Senior Engineer
Haag Global, Inc.
Flower Mound, TX

Adam Croker has been with Haag since 2019. Adam provides a wide array of forensic engineering services, including investigation of building collapses. Adam also has extensive expertise evaluating building envelope damage. Adam is an active member of NJ-TF1, a FEMA Urban Search and Rescue emergency response team operating under the National Response Framework, where he holds a designation of Structural Specialist. In this capacity, Adam maintains pertinent emergency response skillsets, including structural assessment of severely damaged structures and confined space entry. Adam has a BSc. Degree in Civil Engineering from Rowan University and is a licensed professional engineer in 12 states plus D.C. and Puerto Rico. Prior to joining Haag, Adam inspected and analyzed bridges, culverts, and overhead sign structures. He also provided oversight services for highway construction projects and design and inspection services for water/wastewater systems and land development projects, such as green infrastructure improvements, dredging, and park constructions.
