

Primitivo Suarez is a Senior Project Manager at DBI Consultants and leads our office in Orlando, FL. Mr. Suarez has over 20 years of experience in architecture and construction, including project management, cost estimating, building damage evaluation, and construction scheduling.

As a consultant, Mr. Suarez's services on past projects include inspection of building damage, valuation of property damages, estimating building repair and replacement costs, and code research. His portfolio of completed projects include a wide range of evaluations of property damage resulting from water, wind, rain, ice, fire, flooding, and hail. Building evaluations include analysis of all major exterior building finish systems and components to determine the extent of wind or water related damage following severe weather events. Mr. Suarez has inspected and evaluated buildings for damage from Hurricane Delta, Sally, Zeta and Ida. He has contributed to the successful resolution of claims and investigations involving numerous building types and occupancies including single family homes, hotels, residential apartments, condominium buildings, and manufacturing facilities throughout North America. Mr. Suarez has consulted on numerous loss locations for the purpose of developing the scope of work, determining local and regulatory requirements, and preparing building damage reports. He has also provided period of restoration scheduling and claim analyses of submitted proposals and incurred costs.
