

**DONALD T. RONDY, CIAQP, MRSA948**

Mr. Rondy has worked in environmental consulting, building science, industrial hygiene, and business development professions for over 20 years. He has provided professional consulting services for clients in the private/public sectors, as well as government municipalities. His expertise has been utilized by property and casualty insurance carriers, independent adjusters, public adjusters, and legal counsel. He has evaluated over 1,000 residential structures and commercial buildings. Mr. Rondy has provided expert testimony on behalf of his clients, and is published with the American Society of Civil Engineers, Forensic Engineering, and Sixth Congress Proceedings. He has helped with client-based business development and expansion of services lines to new/existing markets. He has created an approved training course for CE 3-24c – Adjuster Option, Florida Department of Financial Services and provided associated in-house training.

Mr. Rondy has been a Senior Project Manager for GBTS for over a year. In this role, he has been responsible for day to day consulting for building science, fieldwork, project management, and marketing. In addition, he provides industrial hygiene, indoor air quality, property loss and water damage, mechanical system performance, litigation and expert witness assessment projects services.

Previously, Mr. Rondy has worked in Building Science for several environmental firms, performing a range of services, such as: Forensic building evaluations (Cause & Origin) for water intrusion, which allows his clients to proceed with potential coverage decisions, knowledge of potential hazards associated with the water loss, and the extent of damage. These data points allow for the production of accurate remediation protocols.
